

## 10<sup>th</sup> October 2022 – Two Rivers Paper – Jim Patterson

A large number of members the club enjoyed a very entertaining evening with Jim Patterson from Two Rivers Paper Company.

He demonstrated the age-old art of paper making using cotton rags in water to make a pulp, and then floating the dispersed pulp particles onto a screen ready to press. He gave a lively explanation of how he got into the industry and what type of paper his company produces.

It was useful to learn about the different types of water colour paper that you can buy in the shops and to see examples of different mediums used on different papers.

There was an opportunity at the end of the demonstration to buy pads and individual sheets of his beautiful handmade paper.
